DETAILED ACTION

Response to Amendment

This Office action is in response to Applicant's communication filed September 25, 2008 in response to the Office action dated June 25, 2008. Claims 1 and 24 have been amended. Claims 1, 4-8, and 24 are pending in this application.

Claim Rejections - 35 USC § 112

In the remarks section of the communication filed September 25, 2008, Applicant submits that portions of application 10/757,250, which is incorporated by reference in the instant application, provide support for certain limitations in claims 1, 4-8, and 24. In view of Applicant's remarks as well as the cited portions of application 10/757,250, the 112, first paragraph rejection of **claims 1, 4-8, and 24** is withdrawn.

Allowable Subject Matter

Claims 1, 4-8, and 24 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose the combination including the limitations of:

(Claims 1 and 24) "...storing a first threshold value and a second threshold value in a first threshold field and a second threshold field, respectively, of the page table in association with the prefetch indicator field and a plurality of counter fields, wherein the first threshold value specifies a maximum counter value in an associated counter field

and wherein the second threshold value specifies a minimum counter value in an associated counter field; responsive to a determination of the metadata being present for the instruction, determining whether data is to be prefetched, wherein the step of determining whether data is to be prefetched comprises determining whether a first counter value in an associated counter field representing a number of outstanding cache misses is less than the first threshold value in the first threshold field, and determining whether a second counter value in an associated counter field representing a number of cache lines chosen to be replaced is greater than the second threshold value in the second threshold field; and responsive to a determination that data is to be prefetched, prefetching data, from within a data structure using the metadata, into the cache in the processor, wherein the step of prefetching comprises prefetching the data responsive to determining that the first counter value in an associated counter field representing the number of outstanding cache misses is less than the first threshold value in the first threshold field, and responsive to a determination that the second counter value in an associated counter field representing the number of cache lines chosen to be replaced is greater than the second threshold value in the second threshold field."

As dependent **claims 4-8** depend from an allowable base claim, they are at least allowable for the same reasons as noted above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
